

MASTER CONTROL UNIT – MCU

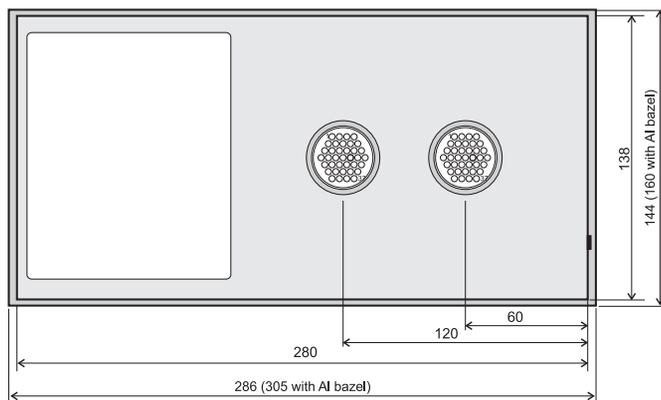

DIMENSIONS

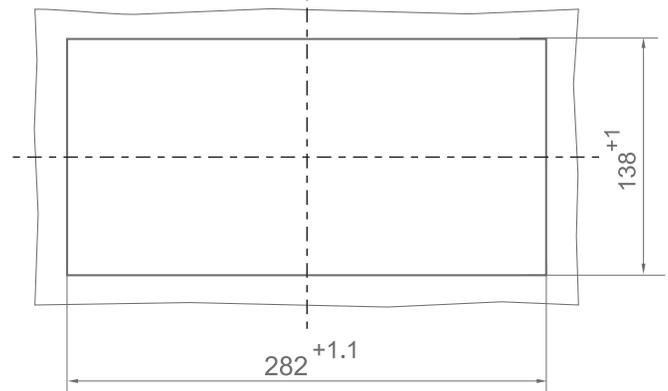

The **Master Control Unit – MCU** is divided into a few functioning sets: PUMP ENGAGEMENT (PTO), PROGRAMMABLE and ILLUMINATED KEYS, INFO DISPLAY AND WARNING LIGHTS, RPM MANAGING SET, WATER AND FOAM TANK LEVEL GAUGE and DIGITAL PRESSURE INDICATORS. The MCU has available 14 factory-programmable keys that can act as switches or push buttons. Keys can be assigned different color-coded symbols such as pictograms or colors. The MCU can power up to 29 digital outputs (MOSFET), which are individually protected by a thermal reversible fuse (0,7 A) and 4 relay outputs (1 A). There are also available eight conditional inputs, protected with optocouplers which may be connected to the positive or negative voltage.

The Pressure Governor allows automated regulation of the engine RPMs according to the pressure fluctuations in the pump, which ensures a constant water flow at the nozzle regardless of the number of connected users. The automatic pressure regulation is turned ON by turning the rotation switch – encoder. This will cause the pressure to increase to 4 bars. The pressure can subsequently be adjusted to the desired value using the encoder in 1 bar increments. If the manual keys for manual control of the RPMs (pressure) are used while the automatic regulation is running, the automatic regulation will be turned off. The pressure can then be increased and decreased manually or set to automatic again by turning the encoder.

SPECIFICATIONS AND ORDERING INFORMATION

SPECIFICATIONS

Power supply	21–30 Vdc
Power consumption	max. 10 W
Relay output 1	4 x, max. 1 A
Relay output 2	1 x, max. 6 A
Digital outputs	29 x MOSFET outputs, max. 0,7 A (PTC protected)
Keys	14 x free programmable with pictograms + 6 x fixed
Measuring range – low pressure gauge	0 ... 19,9 bars
Measuring range – high pressure gauge	0 ... 60 bars
Measuring range – vacuum gauge	-1,0 ... 9,0 bars
Pressure sensor range – low pressure	0 ... 25 bars
Pressure sensor range – high pressure	0 ... 60 bars
Pressure sensor range – vacuum	-1... 9 bars
Transducer electrical connection	3-wire cable 3x0,35mm ² + connector M12
Transducer pressure port fitting	G 1/4"
Transducer housing	Stainless steel 316L
Pressure regulation range /accuracy	4 (min.3) ... 16 (max.24) bars / 0,5bar
Displays	1 x 4-digit; 2 x 3-digit; 2 x 2-digit
Wiring protection	reverse polarity, overvoltage, I/O protected with optocouplers / PTC fuses
Enclosure protection (IEC 529)	IP67 MCU (front panel); IP67 sensors
Operating temperature	-25 °C...+65 °C
Dimension of the MCU	288x144x68 mm or 305x160x68 with Aluminium Bezel (LxHxW)
MCU Connector	CPC connector 37p. 1 x or 2 x
Weight	MCU 1100 g; Sensor: 100 g/pcs

ORDERING INFORMATION

(use the **RED** character below to construct basic product code)

MCU

- +W..... Water tank level gauge
- + F Foam tank level gauge
- + WLLD5 Large light driver – water level
- + FLLD5 Large light driver – foam level
- + WH100/75 Water level auto-fill and refill function between 100% and 75% (Hysteresis)
- + FH100175 Foam level auto-fill and refill function between 100% and 75%(Hysteresis)
- + DPI25 Digital pressure gauge – low pressure
- + DPI60 Digital pressure gauge – high pressure
- + DVI Digital pressure gauge – vacuum
- + ILL Illuminated front panel
- + DWT Water temperature digital gauge
- + MRI08-W .. Remote indicator – water
- + MRI08-F Remote indicator – foam
- + B6/14 Number of user defined keys, e.g. 6 from 14 available
- + MC6 Main cable length, e.g. 6m
- + ALXS Aluminium Eloxated Bezel – Silver
